U.S. Department of
Health and Human Services

Recap

1. **How – Development of Draft Federal FHIR® Action Plan was a collaborative process.**
2. **Why – Align Federal agencies' adoption and use of FHIR.**
3. **What – Draft Action Plan covers six fundamental areas of federal health IT that can use FHIR.**

Comment on the Draft Federal FHIR® Action Plan

- Federal agency partners, FHIR development community, SMEs
- FHIR specs that have 1) high levels of maturity in standards development process and implementation that 2) meet fed interoperability needs; also of interest are specs that 3) can be reused across different uses and/or of a “foundational” nature
- **Comments due November 25, 2024**
- “Final” Federal FHIR® Action Plan expected April 2025

HOW TO COMMENT ON THE DRAFT FEDERAL FHIR® ACTION PLAN

Comments on the draft action plan are accepted year-round; changes will be made periodically based on comments and other changes to the health IT standards environment as ASTP becomes aware of them.

An ISP site account is required in order to comment on the draft action plan.

- If you have an account already, click [here](#) or click the “LOG IN” button at the top right of the ISP and enter your log in information.
- To create an account, click [here](#) or click the “LOG IN” button, then “Create new account” tab above the log in window. Account approval is required and is generally completed within 24 hours.

Once you're authenticated to the ISP site, you can submit comments – scroll to the bottom of the page, enter the text of your comment (or provide attachments, if needed), and submit. Your comment will be reviewed by ONC or other HHS subject matter experts and considered for publication to the draft action plan.
