Workgroup Scope and Membership

Annual Report Workgroup Scope

Overarching Charge:

The workgroup will inform, contribute to, and review draft and final versions of the HITAC Annual Report to be submitted to the Secretary of Health and Human Services and to Congress each fiscal year. As part of that report, the workgroup will help track ongoing HITAC progress.

Specific Charge:

Provide specific feedback on the content of the report as required by the 21st Century Cures Act, including:

- Analysis of HITAC progress related to the target areas
- Assessment of health IT infrastructure and advancements in the target areas
- Analysis of existing gaps in policies and resources for the target areas
- Ideas for potential HITAC activities to address the identified gaps

Outline of the Draft HITAC Annual Report for FY24

- Foreword
- About the HITAC
- HITAC Target Areas in the Cures Act
- Health IT Infrastructure Landscape
- HITAC Progress in FY24
- Appendix

HITAC Target Areas in the 21st Century Cures Act

The 21st Century Cures Act identifies several target areas within which the HITAC should focus its activities. These six target areas are used to organize the report.

Use of Artificial Intelligence that Improves Health and Health Care: [NEW for FY24]

Applying this emerging health IT by providers, patients, and other interested parties safely, securely, and fairly to achieve better health outcomes

Design and Use of Technologies that Advance Health Equity:

Applying health IT to help all people attain their full health potential regardless of social drivers of health

Use of Technologies that Support Public Health:

The facilitation of bidirectional information sharing between the clinical and public health communities

Interoperability:

Achieving a health IT infrastructure that allows for the electronic access, exchange, and use of health information

Privacy and Security:

The promotion and protection of privacy and security of health information in health IT

Patient Access to Information:

The facilitation of secure access by an individual and their caregiver(s) to such individual's protected health information

Health IT Infrastructure Landscape

- The 21st Century Cures Act requires an annual assessment of the health information technology infrastructure, nationally and locally, that allows for the electronic access, exchange, and use of health information.
- This landscape analysis considers federal activities, gaps, challenges, and opportunities and suggests recommended HITAC activities for a set of key topics across each of the target areas.
- Tiered Approach to Key Opportunities
 - Immediate Opportunity
 - Correlates to planned topics for HITAC consideration within the next one to two years, i.e., calendar years 2025-26
 - Longer-Term Opportunity
 - Potential HITAC consideration anticipated to begin in three or more years, i.e., calendar year 2027 or later
