Review of ICAD Task Force Charge – Prior Authorization

- Vision: Support the convergence of clinical and administrative data to improve data interoperability to support clinical care, reduce burden and improve efficiency—furthering implementation of “record once and reuse.”
- Overarching Charge: Produce information and considerations related to the merging of clinical and administrative data, its transport structures, rules and protections, for electronic prior authorizations to support work underway, or yet to be initiated, to achieve the vision.
 - Leverage existing information from HITAC and NCVHS prior authorization hearings, and other sources, to inform the Task Force’s information acquisition and analysis efforts.

Review of ICAD Task Force Charge – Prior Authorization

- Design and conduct research on emerging industry innovations to:
 - validate and extend landscape analysis and opportunities
 - invite industry to present both established and emerging end-to-end solutions for accomplishing medical and pharmacy prior authorizations that support effective care delivery, reduce burden and promote efficiencies.
- Identify patient and process-focused solutions that remove roadblocks to efficient medical and pharmacy electronic prior authorization and promote clinical and administrative data and standards convergence.
- Produce Task Force recommendations and related convergence roadmap considerations for submission to HITAC for their consideration and action. The Task Force will share deliverables with NCVHS to inform its convergence and prior authorization activities.
- Make public a summary of its findings once Task Force activities are complete, no later than September 2020.
